Your new QL-500/550 is a label printer that connects to your personal computer, enabling you to quickly and easily print professional custom labels that you have created on your personal computer using the label editing software provided.

We strongly recommend that you read this User’s Guide carefully before using your QL-500/550, and then keep it nearby for future reference.

Federal Communications Commission (FCC) Declaration of Conformity (For USA Only)

Responsible Party: Brother International Corporation
100 Somerset Corporate Boulevard
Bridgewater, NJ 08807-0911 USA
TEL: (908) 704-1700

Declares that the product
Product Name: Brother Label Printer QL-500/550
Model Number: QL-500/550

complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

• Reorient or relocate the receiving antenna.
• Increase the separation between the equipment and receiver.
• Connect the equipment to an outlet on a circuit different from that to which the receiver is connected.
• The enclosed interface cable should be used in order to ensure compliance with the limits for a Class B digital device.
• Consult the dealer or an experienced radio/TV technician for help.
• Changes or modifications not expressly approved by Brother Industries, Ltd. could void the user’s authority to operate the equipment.
Brother® One-Year Limited Warranty and Replacement Service
(USA Only)

Who is covered:
• This limited warranty ("warranty") is given only to the original end-use/retail purchaser (referred to in this warranty as "Original Purchaser") of the accompanying product, consumables and accessories (collectively referred to in this warranty as "this Product").
• If you purchased a product from someone other than an authorized Brother reseller in the United States or if the product was used (including but not limited to floor models or refurbished product), prior to your purchase you are not the Original Purchaser and the product that you purchased is not covered by this warranty.

What is covered:
• This Product includes a Machine and Consumable and Accessory Items. Consumable and Accessory Items include but are not limited to label cassettes, cutters, stamps, power adapters, cases and batteries.
• Except as otherwise provided herein, Brother warrants that the Machine and the accompanying Consumable and Accessory Items will be free from defects in materials and workmanship, when used under normal conditions.
• This warranty applies only to products purchased and used in the United States. For products purchased in, but used outside, the United States, this warranty covers only warranty service within the United States (and does not include shipping outside the United States).

What is the length of the Warranty Periods:
• Machines: one year from the original purchase date.
• Accompanying Consumable and Accessory Items: 90 days from the original purchase date or the rated life of consumable, whichever comes first.

What is NOT covered:
This warranty does not cover:
(1) Physical damage to this Product;
(2) Damage caused by improper installation, improper or abnormal use, misuse, neglect or accident (including but not limited to transporting this Product without the proper preparation and/or packaging);
(3) Damage caused by another device or software used with this Product (including but not limited to damage resulting from use of non Brother®-brand parts and Consumable and Accessory Items);
(4) Consumable and Accessory Items that expired in accordance with a rated life; and,
(5) Problems arising from other than defects in materials or workmanship.
This limited warranty is VOID if this Product has been altered or modified in any way (including but not limited to attempted warranty repair without authorization from Brother and/or alteration/removal of the serial number).

What to do if you think your Product is eligible for warranty service:
Report your issue to our P-touch Customer Service Hotline at 1-877-478-6824 or to a Brother Authorized Service Center within the applicable warranty period. Supply Brother or the Brother Authorized Service Center with a copy of your dated bill of sale showing that this Product was purchased within the U.S. For the name of local Brother Authorized Service Center(s), call 1-800-521-2846.

What Brother will ask you to do:
After contacting Brother or a Brother Authorized Service Center, you may be required to deliver (by hand if you prefer) or send the Product properly packaged, freight prepaid, to the Authorized Service Center together with a photocopy of your bill of sale.
You are responsible for the cost of shipping, packing product, and insurance (if you desire). You are also responsible for loss or damage to this Product in shipping.
What Brother will do:
If the problem reported concerning your Machine and/or accompanying Consumable and Accessory Items is covered by this warranty and if you first reported the problem to Brother or an Authorized Service Center within the applicable warranty period, Brother or its Authorized Service Center will repair or replace the Machine and/or accompanying Consumable and Accessory Items at no charge to you for parts or labor. The decision as to whether to repair or replace the Machine and/or accompanying Consumable and Accessory Items is made by Brother in its sole discretion. Brother reserves the right to supply a refurbished or remanufactured replacement Machine and/or accompanying Consumable and Accessory Items and use refurbished parts provided such replacement products conform to the manufacturer’s specifications for new product/parts. The repaired or replacement Machine and/or accompanying Consumable and Accessory Items will be returned to you freight prepaid or made available for you to pick up at a conveniently located Authorized Service Center.

If the Machine and/or accompanying Consumable and Accessory Items are not covered by this warranty (either stage), you will be charged for shipping the Machine and/or accompanying Consumable and Accessory Items back to you and charged for any service and/or replacement parts/products at Brother’s then current published rates.

The foregoing are your sole (i.e., only) and exclusive remedies under this warranty.

What happens when Brother elects to replace your Machine:
When a replacement Machine is authorized by Brother, and you have delivered the Machine to an Authorized Service Center, the Authorized Service Center will provide you with a replacement Machine after receiving one from Brother. If you are dealing directly with Brother, Brother will send to you a replacement Machine with the understanding that you will, after receipt of the replacement Machine, supply the required proof of purchase information, together with the Machine that Brother agreed to replace. You are then expected to pack the Machine that Brother agreed to replace in the package from the replacement Machine and return it to Brother using the pre-paid freight bill supplied by Brother in accordance with the instructions provided by Brother. Since you will be in possession of two machines, Brother will require that you provide a valid major credit card number. Brother will issue a hold against the credit card account number that you provide until Brother receives your original Product and determines that your original Product is entitled to warranty coverage. Your credit card will be charged up to the cost of a new Product only if: (i) you do not return your original Product to Brother within five (5) business days; (ii) the problems with your original Product are not covered by the limited warranty; (iii) the proper packaging instructions are not followed and has caused damage to the product; or (iv) the warranty period on your original Product has expired or has not been sufficiently validated with a copy of the proof of purchase (bill of sale). The replacement Machine you receive (even if refurbished or remanufactured) will be covered by the balance of the limited warranty period remaining on the original Product, plus an additional thirty (30) days. You will keep the replacement Machine that is sent to you and your original Machine shall become the property of Brother. Retain your original Accessory Items and a copy of the return freight bill, signed by the courier.
INTRODUCTION

Limitations:
Brother is not responsible for damage to or loss of any equipment, media, programs or data related to the use of this Product. Except for that repair or replacement as described above, Brother shall not be liable for any direct, indirect, incidental or consequential damages or specific relief. Because some states do not allow the exclusion or limitation of consequential or incidental damages, the above limitation may not apply to you.

THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, WRITTEN OR ORAL, WHETHER EXPRESSED BYAFFIRMATION, PROMISE, DESCRIPTION, DRAWING, MODEL OR SAMPLE. ANY AND ALL WARRANTIES OTHER THAN THIS ONE, WHETHER EXPRESS OR IMPLIED, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY DISCLAIMED.

• This Limited Warranty is the only warranty that Brother is giving for this Product. It is the final expression and the exclusive and only statement of Brother’s obligations to you. It replaces all other agreements and understandings that you may have with Brother or its representatives.
• This warranty gives you certain rights and you may also have other rights that may vary from state to state.
• This Limited Warranty (and Brother's obligation to you) may not be changed in any way unless you and Brother sign the same piece of paper in which we (1) refer to this Product and your bill of sale date, (2) describe the change to this warranty and (3) agree to make that change.

Important:
We recommend that you keep all original packing materials, in the event that you ship this Product.

General Precautions

**QL-500/550**
- The QL-500/550 is a precision machine. Do not drop, hit or otherwise bang the QL-500/550.
- Do not grab and lift the QL-500/550 by the DK Roll compartment cover. The cover could come off and the QL-500/550 could fall and become damaged.
- The QL-500/550 may malfunction if left near a television, radio, etc. Do not use the QL-500/550 near any machine that can cause electromagnetic interference.
- Do not expose the QL-500/550 to direct sunlight.
- Do not place or store the QL-500/550 near heaters or other hot appliances, in any location exposed to extremely high or low temperatures, high humidity or dusty locations. Doing so could cause the machine to malfunction.
- Do not use paint thinner, benzene, alcohol or any other organic solvents to clean the QL-500/550. Doing so may cause damage to the surface finish. Use a soft, dry cloth to clean the dirty QL-500/550.
- Do not place any heavy objects or objects containing water on top of the QL-500/550. If water or any foreign object enters the QL-500/550, contact the retail outlet where the QL-500/550 was purchased or your local authorized service center. If you continue to use the QL-500/550 with water or a foreign object in the QL-500/550, the QL-500/550 may be damaged or personal injury could result.
- Do not touch the cutter. Personal injury could result. Take special care when changing the cutter unit.
- Do not insert any objects into or block the label output slot, or USB port.
- Do not place any metal parts near the print head. The print head becomes very hot during use and remains very hot immediately after use. Do not touch it directly with your hands.
- Use only the interface cable (USB cable) included with the QL-500/550.
- Use only genuine Brother accessories and supplies. Do not use any unauthorized accessories or supplies.
- When using the QL-500/550, place it on a stationary, level location.
- Use only the authorized power source for the QL-500/550.
- When not in use for an extended period, remove the DK Roll from the QL-500/550.
- Never disassemble the QL-500/550 or get it wet with water to avoid possible fire or electrical shock. Do not remove the power cord from nor insert it into the electrical outlet with wet hands. Doing so could cause an electrical shock or fire.
- Do not attempt to print labels while the DK Roll compartment cover is open.

**DK Rolls (DK Die-cut Labels and DK Continuous Tape)**
- Use only Brother DK Die-cut Labels or Brother DK Continuous Tapes with this machine. Do not use any DK Roll that does not have the mark.
- If the label is attached to a wet, dirty, or oily surface, it may peel off easily. Before applying the label, clean the surface to which the label will be applied.
- Depending on the environmental conditions and the material, condition, roughness, and shape of the applying surface, part of the tape may not adhere properly or the label may peel off.
- In order to test the adhesive strength of the label or before using the label where safety is a particular concern, test the label by affixing a small piece of it to an inconspicuous area of the intended surface.
- If the label is used outdoors, ultraviolet rays, wind, and rain may cause the color of the label to fade and the ends of the label to peel off.
- Do not expose the DK Rolls to direct sunlight, high temperatures, high humidity, or dust. Store in a cool, dark place. Use the DK Rolls soon after opening the package.
- Scratching the printed surface of the label with your finger nails or metal objects, or touching the printed surface with hands dampened by water, sweat, or medicated cream, etc., can cause the color to change or fade.
- Do not apply labels to any persons, animals, or plants, or in public locations, or on another person's personal belongings without prior consent.
- Note that Brother does not assume responsibility for any damage, etc. arising from failure to follow the precautions listed.
• When peeling a DK Die-cut Label, some portion of the label may remain. Remove the remaining portion before attaching a new label.
• Do not drop the DK Roll, or damage to the DK Roll could result.
• Do not use CD/DVD labels in a slot loading CD/DVD player, for example a CD player in a car where the CD is slid into a slot in the CD player.
• Do not peel off the CD/DVD label once it is applied to the CD/DVD. A thin surface layer may come off, resulting in damage to the disk.
• When applying CD/DVD labels, use the applicator included with the CD/DVD label rolls. Do not use a disk if the labels are not properly applied. Doing so could cause damage to the CD/DVD player.
• Be sure follow the instructions in your CD/DVD player's instruction manual regarding applying CD/DVD labels.
• User's shall take full responsibility for applying CD/DVD labels. Brother accepts no responsibility for any loss or damage of data caused by the inappropriate use of CD/DVD labels.
• Do not apply CD/DVD labels to CD/DVD disks designed for use with ink jet printers. Labels peel off of these disks easily, and using disks with peeled labels can result in loss or damage of data.
• Be careful when handling the DK Roll. Dropping the roll may break the spool and make it unusable.
• Some DK rolls use permanent adhesive for their labels. These labels cannot be neatly peeled off once attached.

**CD-ROM & Software**
• Do not scratch the CD-ROM.
• Do not subject the CD-ROM to extremely high or extremely low temperatures.
• Do not put heavy objects on the CD-ROM or apply force to the CD-ROM.
• The software contained on the CD-ROM is meant for use with the QL-500/550 only. See License on CD for further details. This software may be installed on multiple personal computers for use at an office, etc.

**AC power cord**
• Use only the AC power cord included with the QL-500/550.
• If the QL-500/550 will not be used for an extended period, remove the power supply cord from the electrical outlet.
• Always hold the plug when removing the power cord from or inserting it into the outlet. Pulling on the cord could cause a problem with the power cord.
• The standard electrical outlet shall be installed near the QL-500/550 and shall be easily accessible.

**Cutter unit**
• To prevent injury from the broken cutter blade and unit, follow these points:
  Close the top cover when operating the cutter unit.
  Don’t apply excessive pressure to the cutter unit.
  When the cutter blade becomes dull, replace the existing cutter unit with a new one. If the cutter blade should break off, unplug the power cord from the electrical outlet and remove the cutter unit carefully with tweezers so you do not touch the blade.
  If a paper jam should occur due to a build up of adhesive on the paper guide surface, unplug the power cord from the electrical outlet and wipe away the adhesive buildup on the paper guide surface with a cloth dipped in ethanol or isopropyl (rubbing)alcohol. It is recommended that you clean the paper guide when replacing the cutter unit.
  The average number of cuts is 5,000 or more depending on the operating environment. Dull cut, the inability to cut straight, or frequent paper jams may indicate that the cutter life is near the end. Replace the cutter if these conditions occur.
Symbols Used in this Guide

The following symbols are used throughout this guide to indicate additional information of varying degrees of importance.

⚠️ This symbol indicates information or directions that should be followed - if ignored, the result may be damage, injury, or failed operations.

💡 This symbol indicates information or directions that can help you better understand or use the QL-500/550 more efficiently.
GETTING STARTED

Unpacking Your QL-500/550

Check that the package contains the following before using your QL-500/550. If any item is missing or damaged, please contact the retail outlet where the QL-500/550 was purchased.

P-touch QL-500/550

- P-touch QL-500/550
- USB cable
- Quick Start Guide (English and Spanish)
- CD-ROM
- DK Label & Tape Guide
- Starter roll
- Warranty Card
- Paper guide
- Cleaning Sheet

The QL-500 includes one starter roll of DK Die-cut Standard Address Labels (100 labels). The QL-550 includes one starter roll of DK Die-cut Standard Address Labels (100 labels), and one starter roll of DK Continuous Durable Paper Tape 2-3/7" (25 feet).

GETTING STARTED

Connecting to the Power Supply

1. Plug the power supply cord into a standard electrical outlet.
   - Check that the electrical outlet is 120 V before inserting the plug.
   - Remove the power supply cord from the electrical outlet after you have finished using the QL-500/550.
   - Do not pull the cord when removing it from the electrical outlet. The wire in the cord may become damaged.

Do not connect the QL-500/550 to the USB port of your personal computer yet.

Do not connect the QL-500/550 to your personal computer until directed to do so when installing the printer driver. If the QL-500/550 is connected to a personal computer that does not have the printer driver software installed, the dialog box shown here will appear. Click [Cancel], remove the USB cable, and then install the printer driver software. Refer to “Installing the Software” on page 16.
Installing the DK Roll

There is a wide range of DK Rolls available for use with your QL-500/550, allowing you to create almost any type of label you need.

Available supplies
The types of DK Rolls that may be used with the QL-500/550 are listed below.

<table>
<thead>
<tr>
<th>Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>DK Die-cut Film Labels</td>
<td>A roll of pre-cut film labels that durable in water.</td>
</tr>
<tr>
<td>DK Durable Paper Tape</td>
<td>A roll of continuous paper tape for printing labels of varied length.</td>
</tr>
<tr>
<td>DK Durable Film Tape</td>
<td>A roll of continuous film tape for printing labels of varied length that durable in water.</td>
</tr>
</tbody>
</table>

* Refer to Accessories on page 67 for a complete list of DK Rolls available.
* To obtain optimum performance, use only genuine Brother accessories and DK Rolls.

1. Press the ON/OFF button to turn the QL-500/550 off. Hold the DK Roll compartment cover at the sides near the front of the QL-500/550 and firmly lift up to open the cover.

2. Place the spool into the spool guides in the DK Roll compartment.
   - Make sure that the spool arms are inserted firmly in the spool guides on the left and right.
   - Insert the spool with the DK Roll located on the right hand side of the QL-500/550.
GETTING STARTED

3 Lift the label lever and then thread the end of the DK Roll into the slot immediately before the cutter.

When unable to thread the end of the DK Roll to the slot, thread it as far as possible, lower the label lever and close the cover, then press the FEED button to set the roll.

4 Lower the label lever and then close the DK Roll compartment cover.

Installing the Paper Guide

Your QL-500/550 comes with a paper guide that collects a strip of printed labels that have been printed and not yet cut off from the machine.

1 Attach the paper guide to the front of the QL-500/550 as shown in the figure.

Remove the paper guide when printing more than 10 labels continuously and cutting each label automatically (QL-550 only).
INSTALLING SOFTWARE

Software Overview

Install the following label editor software and printer driver on your personal computer to design professional labels and print them on your QL-500/550.

**P-touch Editor Version 4.1**
Use this powerful label design software to create a wide variety of custom labels such as address labels, file folder labels, CD/DVD labels, etc. P-touch Editor Version 4.1 also contains features to link and use data from databases, as well as features for managing names, addresses and other information previously entered on labels.

**P-touch Library**
Use this software to store labels you have created, and then quickly and easily retrieve these labels for use again.

**Add-In Software for MS Word/Excel/Outlook**
These Add-Ins allow you to quickly and easily copy data into a label directly from Microsoft Word, Excel or Outlook, using the Add-In icon in the tool bar of each application.

**Printer Driver**
This software enables your personal computer to print labels on your QL-500/550. The CD contains the printer driver for the specific model purchased.

Software and Compatible Operating Systems

The software is compatible with the following operating systems and versions of Microsoft applications.

**P-touch Editor Version 4.1, P-touch Library and Printer Driver**
Microsoft Windows 98 SE, Microsoft Windows Me, Microsoft Windows 2000 Professional and Microsoft Windows XP (Home/Professional).

**Add-In Software for MS Word/Excel/Outlook**

Installation Precautions

- Do not connect the USB cable to a personal computer until the software has been installed.
- When using Windows 2000 Professional and Windows XP (Home / Professional), log on as an administrator before installing the software.
- When you are installing the software from the CD-ROM, the following dialog box may appear on the screen. If so, click [OK] and reinstall the software from the beginning.
Installing the Software

The installation procedure differs depending on the operating system running on your personal computer. Refer to the installation procedure for the appropriate operating system to install the software.

When using Microsoft® Windows® Me/2000 Professional/XP (Home/Professional)

1. Start your personal computer and insert the CD-ROM into the CD-ROM drive. A dialog box appears briefly while the InstallShield® Wizard prepares for installation. When the preparation is complete, the InstallShield Wizard welcome dialog box appears.

   - It may take a short time for the dialog box to appear.
   - If the program does not start and the dialog box does not appear, navigate to the contents of the CD-ROM, and then double-click the “Setup.exe” icon.

2. Click [Next] to begin installation. The License Agreement dialog box appears.
3 Carefully read the license agreement. If you agree to the terms and conditions of the license agreement, click [Yes] to continue installation. The Customer Information dialog box appears.

4 Enter your “User Name” and the “Company Name”, and then click [Next]. The Setup Type dialog box appears.
INSTALLING SOFTWARE

5 Select the type of setup you prefer. Change the default destination folder if you wish to place the program files elsewhere, and then click [Next].

- Click [Browse] to select an alternate destination folder.
- Select "Custom" to install a particular feature. For example, to install the printer driver only.

The following items will be installed.

Typical
- P-touch Editor • P-touch Library • Fonts
- Help • Clip Art • Auto Format Templates
- Layout styles • Add-Ins • Manuals • Drivers

Custom
Click [Next] and select the features you want to install on the Select Features dialog box.
Check on to select and off to unselect the items to be installed.

The Add Shortcut dialog box appears.

6 Specify where to add shortcuts (for easy, one click access) for the Brother software, and then click [Next].

If you do not want a shortcut created for an area, clear the check box for that area. Clear all check boxes to add no shortcuts.

The Start Copying Files dialog box appears.
7 Review the settings to ensure all are correct, and then click [Next]. If the settings are incorrect, click [Back] to go back and correct.

• The InstallShield Wizard completes preparations for installing the software, and then the Setup Status dialog box appears.

• After all files necessary to install the P-touch Editor have been copied and registered, the Driver Setup dialog box appears.

   The Driver Setup dialog box does not appear if “Driver” is not selected in Custom installation.

8 When the Driver Setup dialog box instructs you to connect the QL-500/550, plug the connector on the USB cable into the USB port on the back of the QL-500/550.
9 Check that the QL-500/550 is turned on, and then plug the connector on the USB cable into the USB port on your personal computer. When the QL-500/550 is recognized, the installer proceeds with the driver software installation.

When connecting the QL-500/550 to a personal computer via a USB hub, a proper connection may not be possible due to the type of hub used. If this occurs, connect the QL-500/550 directly to the personal computer.

When using Microsoft® Windows® Me
The error dialog box shown to the right may appear during the installation. If this dialog box appears, click [OK]. installed on. The software will automatically make the appropriate settings, so it is not necessary to change these settings.

After the printer driver installation is completed, the User Registration dialog box appears.

10 Select an option and then click [Next]. When “Yes, display the page.” is selected, the online user registration web page is opened in your web browser. When “No, do not display the page.” is selected, installation continues.

The InstallShield Wizard Complete dialog box appears.

11 Click [Finish]. Installation of the P-touch Editor software is now completed.

You may be required to restart your personal computer after installation. Select one of the restart options and click [Finish].
When using Microsoft® Windows® 98 SE

1 Start your personal computer and insert the CD-ROM into the CD-ROM drive. A dialog box appears briefly while the InstallShield Wizard prepares for installation. When the preparation is complete, the InstallShield Wizard welcome dialog box appears.
   • It may take a short time for the dialog box to appear.
   • If the dialog box does not appear, navigate to the contents of the CD-ROM, and then double-click the “Setup.exe” icon.

2 Click [Next] to begin installation. The License Agreement dialog box appears.

3 Carefully read the license agreement. If you agree to the terms and conditions of the license agreement, click [Yes] to continue installation. The Customer Information dialog box appears.
4 Enter your “User Name” and the “Company Name”, and then click [Next].
The Setup Type dialog box appears.

5 Select the type of setup you prefer. Change the default destination folder if you wish to place the program files elsewhere, and then click [Next].

- Click [Browse] to select an alternate destination folder.
- Select “Custom” to install a particular feature. For example, to install the printer driver only.

The following items will be installed.

**Typical**
- P-touch Editor  • P-touch Library  • Fonts
- Help  • Clip Art  • Auto Format Templates
- Layout styles  • Add-Ins  • Manuals  • Drivers

**Custom**
Click [Next] and select the features you want to install on the Select Features dialog box.
Check on to select and off to unselect the items to be installed

The Add Shortcut dialog box appears.
6 Specify where to add shortcuts (for easy, one click access) for Brother Software, and then click [Next].

- If you do not want a shortcut created for an area, clear the check box for that area. Clear all check boxes to add no shortcuts.

The Start Copying Files dialog box appears.

7 Review the settings to ensure all are correct, and then click [Next]. If the settings are incorrect, click [Back] to go back and correct.

- The InstallShield Wizard completes preparations for installing the software, and then the Setup Status dialog box appears.

- After all files necessary to install the P-touch Editor have been copied and registered, the Driver Setup dialog box appears.

  - The Driver Setup dialog box does not appear if “Driver” is not selected in Custom installation.
Installing the Software

8 When the Driver Setup dialog box instructs you to connect the QL-500/550, plug the connector on the USB cable into the USB port on the back of the QL-500/550.

9 Check that the QL-500/550 is turned on, and then plug the connector on the USB cable into the USB port on your personal computer. The Add New Hardware Wizard dialog box appears.

When connecting the QL-500/550 to a personal computer via a USB hub, a proper connection may not be possible due to the type of hub used. If this occurs, connect the QL-500/550 directly to the personal computer.

10 Click [Next]. The next Add New Hardware Wizard dialog box appears.

The name of the detected hardware shown in the dialog box may vary depending on your operating environment.

11 Click [Next]. The next Add New Hardware Wizard dialog box appears.
12 Click [Next].
The next Add New Hardware Wizard dialog box appears.

💡 The settings displayed on the screen may vary depending on the operating environment the software is being installed on.
The software will automatically make the appropriate settings, so it is not necessary to change these settings.

13 Click [Next].
The next dialog box appears. The remainder of this procedure varies depending on the dialog box that appears next.

💡 The name of the detected hardware shown in the dialog box may vary depending on your operating environment.
14 Proceed with one of the following.

- When the Add New Hardware Wizard dialog box appears.
  Click [Finish].
  The new hardware has been detected. Return to step 10.

- When an error dialog box appears.
  Refer to Error Recovery on page 28 to correct the error.

- When the Add Printer Wizard dialog box appears.
  Click [Finish].
  The new hardware has been detected. Go to step 15.

15 Click [Finish].
The User Registration dialog box appears.
16 Select on option and then click [Next].
When “Yes, display the page.” is selected, the online user registration web page is opened in your web browser. When “No, do not display the page.” is selected, installation continues.

The InstallShield Wizard Complete dialog box appears.

17 Click [Finish].
Installation of the P-touch Editor software is now completed.

💡 You may be required to restart your personal computer after installation. Select one of the restart options and click [Finish].
INSTALLING SOFTWARE

■ Error recovery (when installing printer driver on Microsoft® Windows® 98 SE)

1. Click [OK].
   The Driver Setup dialog box appears.

2. Click [Cancel].
   The Confirmation dialog box appears.

3. Turn the QL-500/550 off, and then click [Yes].
   The dialog box displayed before beginning to install the printer driver appears.

4. Turn the QL-500/550 on.
   The Add New Hardware Wizard dialog box appears and you can resume installation from step 10.

■ Re-installing the printer driver

If you ever need to re-install the printer driver, a printer driver installer that installs the printer driver only is provided on the CD.

To start, double click the "D_SETUP.EXE" icon in the root directory of the CD to start the printer driver installer, and then simply follow the directions in the dialog boxes displayed to install the printer driver.

You can also follow the above procedure to install the QL-500 or QL-550 printer driver on additional computers with Windows 98 SE installed.
Uninstalling Software

If for any reason you need to remove the software from your personal computer, follow these steps to uninstall the software.

**Uninstalling P-touch Editor Version 4.1**
This procedure removes the P-touch Editor software and associated software files. The printer driver is not removed by this procedure.

1. Start (→ Settings) → Control Panel → Add or Remove Programs → Brother P-touch Editor Version 4.1 (Brother P-touch Quick Editor) → Change/Remove (Add/Remove...)

   The InstallShield Wizard dialog box appears.

2. Select “Remove” and then click [Next].
   The Confirm Uninstall dialog box appears.

3. Click [OK] to confirm the uninstall.
   The Setup Status dialog box appears.

After the software is removed from your personal computer, the Maintenance Complete dialog box appears.
INSTALLING SOFTWARE

4 Click [Finish] to complete the uninstall.

The uninstall process is now completed.

Uninstalling the Printer Driver
This procedure removes the printer driver from the personal computer.

1 Turn off the P-touch and remove the USB cable from your personal computer.

2 Open the Printer control panel (Printers and Faxes for Windows® XP (Home/Professional)).

   For details, refer to Windows Help.

3 Select the Brother QL-500 (or Brother QL-550) icon and then select “Delete” from the “File” menu.

   Refer to Windows Help for other methods of removing a printer driver from your personal computer.
Connecting the QL-500/550 to Multiple Computers

Using the QL-500/550 as a Shared Printer
The QL-500/550 can be shared by multiple personal computers connected by a network. To share the QL-500/550, connect the QL-500/550 to a computer and set it to be a shared device. The QL-500/550 can now be used as a network label printer.

Using the PS-9000 Print Server
The QL-500/550 can also be used as a network printer by connecting it to the PS-9000 print server (sold separately) designed exclusively for label printers. Providing secure and reliable management of your P-touch network, the PS-9000 is your solution to connecting multiple users to a single P-touch electronic labeling system. The PS-9000 is a USB print server solution for P-touch systems on a 10BASE-T/100BASE-TX network environment. The PS-9000 can also be used to connect a QL-500/550 as an LPR port.

For PS-9000 setup details, refer to the instruction manual for the PS-9000 print server.
CREATING LABELS

Overview

This section describes the general procedure for creating labels using your QL-500/550. Refer to the sections indicated for details and additional information related to each operation.

1 Choose the label you want to create shown below are a few label samples. Your QL-500/550 includes a standard address label.

![Label samples]

2 Insert the appropriate DK Roll.

- Select the appropriate DK Roll for the label you are creating.
- Insert the DK Roll.

DK Rolls and Accessory Guide

p. 13
3 Enter the text.
There are two main methods of entering text on the label.

Enter text with P-touch Editor or use label creation software.
Enter text into a Microsoft Office software application and use our Add-In feature.

4 Edit the label.
P-touch Editor provides a variety of editing functions.

Use the tools in the Draw toolbar and Object dock to edit the label.

5 Print the label.
The label is printed from the QL-500/550.
CREATING LABELS

Starting P-touch Editor

1 To start P-touch Editor, click the Start button on the task bar, point to All Programs (or Programs), point to P-touch Editor 4.1, and then click P-touch Editor.

You can also start P-touch Editor by double-clicking the short-cut icon on the desktop or clicking the short-cut icon in the Quick Launch Tray if these were created during installation.

When P-touch Editor starts, the layout selection dialog box appears.

2 Select an option in the dialog box, and then click [OK].

Refer to P-touch Help for details of the options available when starting P-touch.
After installing and starting the software, you are now ready to create your own labels. While you can create a wide range of labels using P-touch Editor, there is generally a common workflow for creating any label.

Select the type and size of label → Enter text → Apply formatting to text → Add decorative objects to the label → Print the completed label

Each process in this workflow is described in the following sections.

**Layout Window**
The layout window appears after P-touch Editor starts and you select the type of layout from the layout selection dialog box. Some of the most commonly used features of the layout window are described below. We will be using these features in the examples in the following sections.

1. **Standard toolbar**
   Provides icons for file, print, edit and view functions.

2. **Property dock**
The property dock contains the Print, Page, Text, Layout and Database property boxes for setting the font, format, etc. Click on the buttons at the left of the dock to display and close the corresponding property box.

3. **Draw toolbar**
Provides tools for drawing graphics on the label.

4. **Layout work area**
The layout work area displays the label and imported objects as you edit the label contents.

5. **Object dock**
The object dock contains icons for quick access to functions for adding text, graphics, tables, frames and other decorative objects to the label.

6. **Label List/Database window**
Displays data imported from a database or registered in the Label List.
CREATING LABELS

Creating an Address Label
This section describes the process of creating an address label as an example. In this example we will create a standard sized address label with the addressee’s name in bold and a slightly larger font size, and with a simple single-line frame with rounded corners.

1 In the Page properties box, select Standard Address from the pull-down list of label types. The tape length and width settings are automatically set to the size of a standard address label.

If the Page property box is not displayed in the Property dock click to open it.

2 Click the Text icon in the Object dock to create a text box, and then type in the name and address.

3 Select the name (the first line of text) and then apply bold and slightly larger font size settings using the Text properties box.

The settings are applied to the selected text. The label should now be ready for printing. Refer to Printing the Label for further details.

If the Text property box is not displayed in the Property dock click to open it.
CREATING LABELS

Printing the Label
We will now print the label created in the earlier example.

1. In the Print properties box, select the number of copies to be printed (1) and then click . The label is printed.

   If the Print property box is not displayed in the Property dock click  to open it.

2. Cut off the printed label using the CUT button (QL-550) or the CUT lever (QL-500).

   When the "Auto Cut" option is checked in the Print dialog box for the QL-550, the printed labels are automatically cut after printing.

   When using the QL-500, make sure that printing is completed before cutting the label with the CUT lever. Attempting to cut the label before printing is completed will result in an error. If an error occurs, turn the power off and then on again to clear the error.

   Printing options and label cutting
Click  in the Print properties box to open the Print dialog box and select printing options.

   ### Print Options

<table>
<thead>
<tr>
<th>Setting</th>
<th>Details</th>
</tr>
</thead>
<tbody>
<tr>
<td>Auto Cut (QL-550 only)</td>
<td>Checked - the printed labels are automatically cut after printing.</td>
</tr>
<tr>
<td></td>
<td>Unchecked - to cut the label, press the CUT button.</td>
</tr>
<tr>
<td>Mirror Printing</td>
<td>Prints a mirror image of the label. Use this option clear tape to create labels that can be applied to the inner surface of glass etc. and read from the outside.</td>
</tr>
<tr>
<td>Output Directly To Printer Driver</td>
<td>Sends the data directly from the application to the printer driver. We recommend that you leave this box checked when printing labels.</td>
</tr>
<tr>
<td>Copies</td>
<td>Selects the number of copies to be printed.</td>
</tr>
</tbody>
</table>

   When printing a label you can select whether priority is given to print quality or print speed. When Printing Speed over Quality has been checked, some objects may not print or the printed image may appear slightly different.

   Click  to open the Brother QL-500/550 Properties dialog box and then select one of the Quality radio buttons.
CREATING LABELS

Saving the Label
You can save the label you have created in a file for later use.

1 Click \( \text{Save} \) in the Standard toolbar.
The Save As dialog box appears.

When the current label layout has already been saved, changes are saved to the existing file name.

2 Navigate to the folder where you want to save the file, enter the file name, and then click \( \text{Save} \).
The label layout is saved in the location specified.

About file names
File names can be up to 255 characters long, and cannot contain the following characters.
- Slash (/).
- Backslash (\).
- Greater than or less than symbols (> , <).
- Asterisk (*).
- Question mark (?)
- Double quotations (").
- Pipe symbol (|).
- Colon (:).

Opening an Existing Label File
Label layouts that have been saved to a file can quickly and easily be opened and used again.

1 Click \( \text{Open} \) in the Standard toolbar.
The Open dialog box appears.

2 Use the drop down menus to navigate to the folder containing the target file, select the file, and then click \( \text{Open} \).
The file is opened and the label layout is displayed in the layout window.
Creating Bar Code Labels

You can create labels with bar codes for use with cash registers, stock control systems or other bar code reader systems.

1. In the Page properties box, select Normal Format from the pull-down list of label types. The tape length and width settings are automatically set to the size of a standard address label.

   If the Page property box is not displayed in the Property dock, click to open it.

2. Click the \( \text{\textbullet} \) in the Object dock. The Bar Code Properties dialog box appears.

3. Click the [Protocol] tab to open the Protocol page, and then select a bar code protocol from the "Protocol:" list box.

   A description of the selected protocol appears below the "Protocol:" list box.

4. Click the [Setup] tab to open the Setup page, and then select any bar code format options for the selected protocol.

   The options that can be chosen may differ depending on the protocol selected.

5. Click the [Input] tab to open the Input page, type the data for the bar code in the Data text box, and select any options that are available for the selected protocol.

   The options that can be chosen may differ depending on the protocol selected.

6. Click [OK]. The bar code appears on the label in the layout work area.
CREATING LABELS

- Brother shall not assume any responsibility for any loss or damage caused by bar code labels being misread.
  - If the bar code reader is not able to read bar code labels printed using the "Give priority to print speed" option, try using the "Give priority to print quality" option.
  - The bar code reader may not be able to read bar code labels with narrow bar codes.
  - The QL-500/550 is not designed exclusively for creating bar code labels. Always check that bar code labels can be read by the bar code reader.
- Always use the largest bar code size possible. The bar code reader may not be able to read bar code labels with small bar codes.
- Continuously printing a large number of labels with bar codes can overheat the print head, which may affect printing quality.
- For best results, print bar code labels in black on a white label. Some bar code readers may not be able to read bar code labels created using colored labels. Always check that bar code labels can be read by the bar code reader.
- To make changes to an existing bar code in a label, double-click the bar code to open the Bar Code Properties dialog box and change the settings.
  - You can create bar code labels even more efficiently by connecting to a database and retrieving data for several labels. Refer to page 58 or P-touch Editor Help for details.

Brother P-touch label printers are not designed specifically as bar code printers. The following suggestions are recommended when reading/printing bar code labels:
- Please verify the bar code readability with your specific bar code scanner.
- Bar codes should be printed in black on white labels. The bar code reader may not be able to scan labels created with other substrate colors.
- The bar code width should be set to the largest dimensions possible. If the bar code size is too small, the bar code reader may not be able to scan the bar code.
- The entire bar code image, including left and right margins, must be within the dimensions of the label image area.
Please note that the foregoing is solely for your information. This is not a warranty or representation about the fitness of P-touch label printers to print bar code labels or the quality or legibility of bar code labels printed with your P-touch label printer. Brother and its affiliates specifically disclaim any and all damage, loss and liability arising from the use of bar code labels printed by a P-touch label printer.
Creating Other Types of Labels
The following are examples of the variety of labels that can be created using P-touch Editor and some optional features. Refer to How To in the online P-touch Editor Help for further details.

CREATING LABELS

Using Help
P-touch Editor has its own Help application that offers further detailed information on the features available with P-touch Editor and how to use these features.

■ Opening Help

1 Start P-touch Editor. Refer to “Starting P-touch Editor” on page 34.
   The layout window appears.

2 Select “P-touch Editor Help” from the Help menu or use F1.
   The P-touch Editor Help window appears.

   ![Help window diagram]

   1. Toolbar
      Contains quick and easy access icons used in Help.

   2. Tabs
      Each tab provides a different search method for finding information about the P-touch Editor.

   3. Menu
      Displays the information choices for each tab.

   4. Topic Area
      Area of the screen where information on each of the topics is displayed.

Using P-touch Editor
CREATING LABELS
Using P-touch Editor

Printing Help
The contents of the Help topics can be printed to a standard printer (not the QL-500/550).

1 Select a topic in the Contents tab.

2 Click on the toolbar.
The Print Topics dialog box appears.

3 Select the range of topics to be printed, and then click . The Print dialog box appears.

4 Select any options for your standard printer, and then click .
The specified Help topics will be printed.
CREATING LABELS

The Label List

The Label List is a built-in database for storing information from previously created labels or for potentially new labels.

How the Label List Works
The Label List is displayed in the Label List window, and works similarly to a Database connection. Refer to “Using a Database” on page 58 for details about connecting to a database. However, with the Label List, the database cannot be imported and can only be exported in CSV format, but records can be added, deleted, and edited (note that the fields are however fixed).

Views
The Label List can be displayed in either Record View or Form View. To change from one view to the other, right-click in the Database window, and then select either “Record View” or “Form View” from the associated menu.

Record view
Displays a list of records and their associated data for each record in the Label List.

1. Record selector
   Clicking the record selector selects the entire record. The record currently selected is indicated by the ➤ mark.

2. Field selector
   Displays the field name. Clicking the field selector selects the entire column.

3. Cell
   Displays the field data for each field in a record.

Once fields are merged into a label layout, the corresponding data appears in the label when a record is selected. Simply select a different record to change the contents of the label.

- Each row in the list indicates a record.
- The font used in the record view can be changed by changing the settings on the [Database] tab of the Options dialog box. From the “Tool” menu, select “Options” to open the Options dialog box.
- The height of a record can be adjusted by dragging the record divider line between records in the record selector column. Similarly, the width of a field can be adjusted by dragging the field divider line between fields in the field selector row.
CREATING LABELS

The Label List

Displays the selected record data in a form rather than as a list.

Using the Label List

As an example we will create a set of address labels using the Label List. Before beginning, create a new layout and select the label size. Refer to "Creating an Address Label" on page 36. The label list would be used when a user wishes to print (reprint) a label containing the stored information.

Opening the Label List

1 Click the File menu, point to Database, and then click Label List. The Label List window appears.

Entering data

In our example we will use the Label List view, the Title field for the name and the Body field for the address on a label.

1 Double-click on the Title field to place the cursor in the field, and then type in the name.

2 Double-click on the Body field to place the cursor in the field, and then type in the address.

To enter a new line in a cell, hold down the [Ctrl] key and press the [Enter] key.

3 Repeat this for all necessary fields.

The Label List

Form view

Field name | Field data
--- | ---
| |
CREATING LABELS

4 To add the next record, right click in the Label List window, and select “Create New Record” from the pull down menu.

A new record appears in the list.

5 Enter the name and address, etc., in the new record.

6 Repeat steps 4 and 5 to add more records.
Creating Labels Using a Layout Style and Data from the Label List
The label layout can now be created using the fields in the Label List as a guide.

What is a Layout Style?
- A Layout Style lets you easily use a variety of previously registered label layouts.
- You can also register new layouts you have created and quickly and easily recall these for use again later.

When is this useful?
- You can easily create labels by simply selecting a Layout Style then just entering text in the layout displayed in the P-touch Editor's Layout window.
- You can quickly create and print labels using the Merge Fields function to automatically arrange data from a Label List or database in the desired layout.

Choosing a Default Layout Style
A default layout style can be selected for each individual DK roll type. Initial defaults have been set and are indicated with the word “default” as part of the Layout Style name.

To set a default layout style for a particular DK roll type.

1 Load the DK roll, for the type you wish to set the default style for, into the QL-500/550.

2 Click the Format menu, and then click Apply Layout Style to open the list of available layout styles to select from. Use the category pull down menus to select layout styles from alternate categories.

If the layout style you want is not in any of the category lists, create a new layout style (refer to the "Using a Layout Style to create a label" section).

3 Click on the applicable layout style and Click OK. This will set the default layout style for your loaded DK roll type.

4 Close the window and repeat steps 1-3 for each DK roll type.

Using a Layout Style to create a label.

1 Click the Format menu, and then click Apply Layout Style.

The Apply Layout Style dialog box appears.
CREATING LABELS

2 Select the appropriate layout for the label you want to create, and then click OK. The Merge Fields dialog box appears. Each label size has default Layout Style. For each, the layout style used the last time for that specific label size will be automatically saved and used the next time.

3 On the new layout, each field has a name, indicated in the Merge Fields dialog box as Layout Object. For each field, assign an object from the Label List. To assign the object, click on the Layout Object in the left column, and the corresponding Label List Object in the right column. Repeat for all the objects. When finished, click OK to return to the label layout and view the label.

Creating and registering a new Layout Style using the Label List fields
When there is no pre-designed New Layout Style for the label you want to create, you can design a new layout and register it as a New Layout Style.

1 Click the File menu, point to New and the click New Layout to create a new layout.
2 To add the field from the Label List to the label layout, click on the field selector of the field you want to add to the label, and then drag and drop it on the layout. A pop-up menu appears.

3 Select “Text” from the pop-up menu. The field is added to the layout and displayed as text.

4 Repeat steps 1 and 2 to add more fields to the layout. You can add multiple fields at once by holding down the Shift key and selecting contiguous field selectors.

5 Arrange the objects on the layout, and apply any format settings to complete the layout.

6 Select Layout Style and click (Save). The first time you register a new layout, the Add category dialog box appears. Enter a category name. Any layouts registered by you will be stored in this category.
CREATING LABELS

Printing labels from the Label List

1. Click in the Print properties box to open the Print dialog box and select the print options. Refer to “Print Options” on page 37 for details.
   The “Auto Cut” option is not available when using the QL-500.

2. Select a Print Range option to select which records are printed. Refer to the Print Range Options table for details.

3. Click in the Standard toolbar. The specified labels are printed.

<table>
<thead>
<tr>
<th>Print Range Options</th>
</tr>
</thead>
<tbody>
<tr>
<td>Setting</td>
</tr>
<tr>
<td>All Records</td>
</tr>
<tr>
<td>Current Record</td>
</tr>
<tr>
<td>Selected Record(s)</td>
</tr>
<tr>
<td>Record Range</td>
</tr>
</tbody>
</table>

- Optionally, a record can easily be printed by selecting the record in the Label List, then clicking in the Standard toolbar.
- You can select multiple non-contiguous records for printing with the Selected Record(s) and Record Range options by holding down the [Ctrl] key and selecting the desired records.
CREATING LABELS

Using P-touch Editor with Other Applications

If during software installation the Add-In feature was selected, an Add-In function is also installed for Microsoft Word, Microsoft Excel and Microsoft Outlook (provided these applications are installed on your personal computer). Using these Add-In functions, you can quickly and easily create a label by highlighting the information and clicking the P-touch icon.

- The Add-In function can be installed to the following applications and versions:
  - Microsoft Word 97/2000/2002/2003,
  - Microsoft Excel 97/2000/2002/2003,

- After installing the Add-In functions for Microsoft Word, Microsoft Excel or Microsoft Outlook, the "Security Warning" dialog box may appear when starting these applications, depending on the application's security settings.

  If this dialog box appears, check the "Always trust macros from this publisher." checkbox, and then click the "Enable Macros" button.

  Refer to "Help" of the application you are using for details on security settings.

Add-In Utility

The Add-In Utility allows you to install/uninstall the add-In function for selected programs. To start the Add-In Utility, click the Start button on the task bar, point to All Programs (or Programs), point to P-touch Editor 4.1, point to P-touch Tools, and then click Add-In Utility.

In the Brother P-touch Add-In Settings dialog box, check the checkbox of the applications that you want to use the P-touch Add-In with, or uncheck the checkbox of the applications that you do not want to use the P-touch Add-In with.

Make sure that the applications you want to change the settings for are not running before changing the settings.
CREATING LABELS

Microsoft Word

You can start the P-touch Add-In and copy the highlighted data directly onto a label from Microsoft Word. The highlighted data is copied as text and automatically added to a new record created in the Label List. The Title and Body fields of the new record are then merged into a new label layout, which is displayed in the Add-In Preview window.

Creating a label using data from Microsoft Word

1. Open a Microsoft Word document and select the data you wish to place on a label. To select the data, highlight the text.
2 Click in Microsoft Word’s standard toolbar. P-touch Editor starts and the Add-In Preview window appears showing the newly created label.

Add-In Preview window toolbar

- **Print button**
  - Prints the current label.
- **Print Settings button**
  - Opens the Print dialog box.
- **Check Media button**
  - Checks the size of the DK Roll currently inserted in the QL-500/550.
- **Change Paper Setting**
  - Opens the Paper Settings dialog box.
- **Zoom controls**
  - Zoom in or zoom out on the label layout, or select the magnification using the pull-down list.
- **Previous/Next Record buttons**
  - Displays the contents of the previous/next label.
- **Edit button**
  - Opens the current label in the P-touch Editor Layout window for editing.
- **Label List checkbox**
  - When checked, the imported data is added to the Label List.
- **Select Layout Button**
  - Opens the Layout Style window for selecting Layout Style.
- **Help button**
  - Opens the P-touch Editor Help.
- **Close button**
  - Closes the Add-In Preview window.

- Refer to P-touch Editor Help for other methods of starting P-touch Editor from within Microsoft Word.
- An error message appears if there is no data highlighted, or if the data highlighted contains an object not supported by P-touch Editor.
- Refer to “How Microsoft Word data is added to the Label List” on page 54 for details of how the selected data is automatically added to the Label List.
- The P-touch Microsoft Word Add-In cannot be used if Microsoft Outlook is currently in use. Close Microsoft Outlook and restart Microsoft Word to enable the Add-In.
CREATING LABELS

3 Click \( \text{Print} \) to print the label.

To edit or customize the text or label layout, click \( \text{Edit Label} \).
The full P-touch Editor screen appears and you can edit the label.

**How Microsoft Word data is added to the Label List**
A new record is automatically created and the text in the selected data is added to the following fields.
- The current date is added to the Date field.
- The first line is added to the Title field.
- All remaining lines are added to the Body field.

**Microsoft Excel**
You can start the P-touch Add-In and copy the highlighted data directly onto a label from Microsoft Excel. The highlighted data is copied as text and automatically added to new records created in the Label List. The Title, Body and Code fields of the new record are then merged into a new label layout, which is displayed in the Add-In Preview window.

**Creating a label using data from Microsoft Excel**

1 Open a Microsoft Excel worksheet and select the data you wish to place on a label. To select the data, highlight the text.
Using P-touch Editor with Other Applications

2 Click in Microsoft Excel's standard toolbar.
P-touch Editor starts and the Add-In Preview window appears showing the newly created label.

Mr. Bob Goodman
2399 Pacific Avenue #23
Anytown, USA
94115

3 Click to print the label.

To edit or customize the text or label layout, click . The full P-touch Editor screen appears and you can edit the label.

How Microsoft Excel data is added to the Label List
A new record is automatically created for each row selected and the text in the selected data is added to the following fields:
- The current date is added to the Date field.
- The content of the first cell in the row is added to the Title field.
- The content of the remaining cells in the row is added to the Body field.
- If the last cell selected in the row contains numeric data and hyphens only, the content of that cell can be added to both the Body field and the Code field.
Creating Labels

Microsoft Outlook

You can start the P-touch Add-In and copy the highlighted data directly onto a label from Microsoft Outlook. The highlighted data is copied as text and automatically added to new records created in the Label List. The Title, Body, and Code fields of the new record(s) are then merged into a new label layout, which is displayed in the Add-In Preview window. Data can be imported from the Contacts, Calendar, Deleted Items, Drafts, Inbox, Journal, Notes (not including the Notes dialog box), Outbox, Sent Items, and Tasks windows.

Creating a label using data from Microsoft Outlook

1. Open Microsoft Outlook Contacts and select the data you wish to place on a label. To select the data, highlight the contact name.

2. Click in Microsoft Outlook’s standard toolbar. P-touch Editor starts and the Add-In Preview window appears showing the newly created label.
3 Click  to print the label.

To edit or customize the text or label layout, click .

The full P-touch Editor screen appears and you can edit the label.

**How Microsoft Outlook data is added to the Label List**

When importing data from the Contacts window, a new record is automatically created for each contact selected and the contact data is added to the following fields as text:

- The current date is added to the Date field.
- The contact’s Full Name is added to the Title field. When the contact’s address is Business, the contact’s Job title is also added to the Title field.
- If the “This is the mailing address.” checkbox is checked, the contact’s address is added to the Body field. When the contact’s address is Business, the contact’s Company is also added to the Body field.
- The contact’s ZIP/Postal code is added to the Code field.

When importing data from any other Outlook window, a new record is automatically created and the selected data is added to the following fields as text:

- The current date is added to the Date field.
- The first line is added to the Title field.
- All remaining lines are added to the Body field.

- Uncheck the “Label List” checkbox in the Add-In Preview window when you do not want to register the data in the Label List.
- The data is copied onto a label formatted with the default Layout Style. To change the Layout Style, click to open the full P-touch Editor screen and edit the layout or apply a different Layout Style. Refer to “Creating Labels Using a Layout Style and Data from the Label List” on page 47 for details.
CREATING LABELS

Using a Database

■ What is the database function?
The database function allows you to use existing data from another source to quickly create custom labels containing database content - for example name/address labels or inventory labels with codes. The supported formats are mdb (MS Access), csv (generic format) and xls (MS Excel).

■ Creating a name badge label using a database

This procedure describes how to retrieve the database information and associate it to the layout.

1. In the Page properties box, select Visitor Name Badge Label from the pull-down list of label types.
The tape length and width settings are automatically set to the size of a Shipping label.

   If the Page property box is not displayed in the Property dock click to open it.

2. Prepare a rough label layout for the label you want to create.

3. To retrieve the database information and associate it to the layout (merge), click the File menu, point to Database, and then click Connect.
The Open Database dialog box appears.
4 Navigate to the file containing the data to be used for the labels and open the file. We will be using MS Excel data for this example. After opening the database file, the Database window appears below the Layout work area.

5 Click on the field selector of the field you want to add to the label, for this example we will use the Name field, and then drag and drop it on the layout. The field is added to the layout.
CREATING LABELS

6. Use the Text Properties dialog box to update the font, position and size of the new field.

7. Repeat steps 4 and 5 to add more fields to the layout.
   Once you have competed editing the layout, the label is ready to be printed.
   You can check the layout and content of each label by selecting the corresponding record in the Database window.

You can also move from record to record by using the “Next Record” and “Previous Record” buttons in the “Database Properties” box.
Print the label(s) using one of the methods below

• To print the label currently displayed in the Layout work area by itself, click in the Print Properties box.
• To print several labels, hold down the [Ctrl] key and select the records in the Database window for the labels you want to print, and then click in the Print Properties box.
• To print labels for all records, click the Print Setup button. Select “All Records” for “Print Range” and click to print the labels.

The “Auto Cut” option is not available when using the QL-500.
Your QL-500/550 may need cleaning from time to time, particularly if you are using it in a dusty environment.

Cleaning the Print Head
The DK Paper Roll used in the QL-500/550 is designed to automatically clean the print head. As the DK Paper Roll passes over the head during printing or label feeding, the print head is cleaned. If necessary, simply feed the DK Paper Roll using the FEED button to clean the print head.

Cleaning the Roller
Use a Cleaning Sheet to clean the roller as described in the following procedure. Refer to Accessories on page 67 for details on purchasing Cleaning Sheets.

1. Turn off the QL-500/550.

2. Hold the DK Roll compartment cover at the sides near the front of the QL-500/550 and firmly lift up to open the cover.

3. Remove the DK Roll.

Be sure to remove the DK Roll before cleaning the roller. The roller cleaning function will not operate correctly if the DK Roll is not removed.
4 Thread the end (①) of the Cleaning Sheet into the slot immediately before the cutter.
   • Do not peel off section (②) of the sheet.
   • Make sure that the printed surface of the Cleaning Sheet is facing up.

5 After the Cleaning Sheet is inserted in the slot, peel off section (②) of the sheet.

6 Turn on the QL-500/550.

7 Press and hold the FEED button for at least one second.
   The roller rotates for 4" (10 cm).
   • The length of the Cleaning Sheet is 3" (8.5 cm).
   • Pressing the FEED button for less than one second makes the roller rotate for 1/3" (8 mm) only.

8 The adhesive surface of the Cleaning Sheet removes any dirt and lint from the roller, and cleaning is then completed. A Cleaning Sheet can only be used one time.
Changing Cutter Unit
Repeated use of the cutter unit will eventually reduce the sharpness of the blade. When this occurs, purchase a replacement cutter and then follow this procedure to replace the cutter. Refer to Accessories on page 67 for details on purchasing a replacement cutter.

1. Turn off the QL-500/550 and unplug the power code from the electrical outlet.

2. Open the DK Roll compartment cover, lift up the label lever, and remove the DK Roll from the compartment.

3. Using a screw driver, loosen the screw securing the cutter unit.
   - The screw securing the cutter unit cannot be completely removed. Simply loosen it to remove the cutter unit from the QL-500/550.

4. Grip the tab and lift out the cutter unit.
   - Be very careful not to touch the sharp edge of the cutter.

5. Press the new cutter unit in the machine with the two holes aligned with the to posts in the machine.

6. Tighten the screw securing the cutter unit.

7. Install the DK Roll and close the DK Roll compartment cover.
   For details refer to “Installing the DK Roll” on page 13.

8. Plug the power cord back into the electrical outlet.
## Troubleshooting

### What to do when...

<table>
<thead>
<tr>
<th>Problem</th>
<th>Solution</th>
</tr>
</thead>
<tbody>
<tr>
<td>The QL-500/550 does not print, or a printing error is received.</td>
<td></td>
</tr>
<tr>
<td>• Is the USB cable loose?</td>
<td>Check that the USB cable is connected correctly.</td>
</tr>
<tr>
<td>• Is the DK Roll installed correctly?</td>
<td>If not, remove the DK Rolls and reinstall.</td>
</tr>
<tr>
<td>• Is there enough roll remaining?</td>
<td>Check that there is enough roll remaining.</td>
</tr>
<tr>
<td>• Is the DK Roll compartment cover open?</td>
<td>Check that the DK Roll compartment cover is closed.</td>
</tr>
<tr>
<td>The power button does not light up or flash.</td>
<td></td>
</tr>
<tr>
<td>• Is the power supply cord connected correctly?</td>
<td>Check that the power supply cord is connected and plugged in. If connected correctly, try connecting it to another electrical outlet. &quot;If the power button still does not light up or flash, contact Brother Customer Service at 1-877-4-P-touch.</td>
</tr>
<tr>
<td>The printed label contains streaks or poor quality characters, or the label is not fed correctly.</td>
<td></td>
</tr>
<tr>
<td>• Is the print head or roller dirty?</td>
<td>While the print head generally remains clean under normal use, lint or dirt from the roller may become stuck on the printer head. If this occurs, clean the roller. Refer to “Cleaning the Roller” on page 62.</td>
</tr>
<tr>
<td>A data transmission error appears on the personal computer.</td>
<td></td>
</tr>
<tr>
<td>• Is the correct port selected?</td>
<td>Check that the correct port is selected from the “Print to the following port” list in the Printer Properties dialog box.</td>
</tr>
<tr>
<td>• Is the QL-500/550 in cooling mode (the LED lamp is flashing slowly)?</td>
<td>Wait until the LED lamp stops flashing and then try printing again.</td>
</tr>
<tr>
<td>Labels are jammed in the cutter or are not ejected correctly after printing.</td>
<td></td>
</tr>
<tr>
<td>• Does the edge of the cutter unit seem to have lost its sharpness?</td>
<td>Replace the cutter. For details, refer to “Changing Cutter Unit” on page 64.</td>
</tr>
<tr>
<td>• Is there dirt or lint on the roller preventing it from rolling freely?</td>
<td>Use a Cleaning Sheet to clean the roller. For details, refer to “Cleaning the Roller” on page 62.</td>
</tr>
<tr>
<td>Layout style is not updated when Add-in is still activated and a new label roll is installed.</td>
<td></td>
</tr>
<tr>
<td>• Is new label roll installed before activating the P-touch Add-in (The P-touch function is added to your standard Microsoft toolbar)?</td>
<td>Exit the P-touch Add-In, load the 2nd label roll type, reactivate the P-touch Add-in, select &quot;Select Layout&quot;, and then verify the layout.</td>
</tr>
<tr>
<td>Microsoft Word P-touch Add-In is not available when Microsoft Outlook is opened.</td>
<td></td>
</tr>
<tr>
<td>• Is Microsoft Outlook opened when using Microsoft Word P-touch Add-in?</td>
<td>Close Microsoft Outlook and restart Microsoft Word to enable the Add-In.</td>

Contact Information

Service Center Locations
If you need a local service center, please call 1-800-284-HELP (4357) to locate the authorized service center closest to you.
Note: Be sure to call the Service Center before your visit. Service centers do not provide operational assistance. See “Operational Assistance”.

Operational Assistance
For technical and operational assistance you may call Brother Customer Service at:
Voice 1-877-4-PTouch, or Fax 1-901-379-1210

Assistance on the Internet
For product information and downloading the latest drivers: http://www.brother.com
For purchasing accessories and certain Brother products: http://www.brothermall.com

Accessories and Supplies
To order Brother accessories or supplies by Visa, MasterCard, Discover or American Express, you may call toll free 1-888-879-3232, or complete the order form in your user’s guide and fax both sides of the form to 1-800-947-1445.

For purchasing accessories on the Internet: http://www.brothermall.com

To order by mail or pay by check, please complete the accessory order form and mail it along with payment to:
Brother International Corporation
Attn: Consumer Accessory Division
P.O. Box 341332
Bartlett, TN 38184-1332

Fax-Back System
Brother Customer Service has installed an easy-to-use Fax-Back System so you can get instant answers to common technical questions and product information for all Brother products. This system is available 24 hours a day, 7 days a week. You can use the system to send the information to any fax machine, not just the one you are calling from. Please call 1-800-521-2846 and follow the voice prompts to receive faxed instructions on how to use the system and an index of Fax-Back subjects.
