Safety Precautions

**WARNING** Indicates a potentially hazardous situation which, if not avoided, could result in death or serious injury.

Follow these guidelines to avoid the risk of fire, burns, injury, electric shocks, rupture, overheating, abnormal odors or smoke.

- Always use the specified voltage and the included AC adapter (AD-E001) for the P-touch labeler to prevent any electrical failure.
- Do not touch the P-touch labeler during a lightning storm.
- Do not use the P-touch labeler/AC adapter in places of high humidity such as bathrooms.
- Do not touch the power cord.
- Do not place heavy objects on, or damage the P-touch labeler, power cord or plug. Do not forcibly bend or pull the power cord. Always hold the AC adapter when disconnecting from the power outlet.
- Make sure that the plug is fully inserted in the power outlet. Do not use an outlet that is loose.
- Do not allow the P-touch labeler/AC adapter/power plug/batteries to get wet, for example, by handling with wet hands or spilling beverages on them.
- Do not disassemble or modify the P-touch labeler/AC adapter/batteries.
- Do not use metal objects, such as tweezers or a metallic pen, to change the batteries.
- Do not throw the batteries into fire or expose to heat.
- Disconnect the AC adapter, remove batteries immediately and stop using the P-touch labeler if you notice abnormal odor, heat, discoloration, deformation or anything unusual while using or storing it.
- Do not use a damaged or leaking battery as the fluid may get on your hands.
- Do not use a deformed or leaking battery or one whose label is damaged. There is a possibility of damaging the P-touch labeler.
- Since loss of eyesight may result if leaked fluid from batteries gets into your eyes, immediately rinse your eyes with a large amount of clean water, and then seek medical attention.

**CAUTION** Indicates a potentially hazardous situation which, if not avoided, may result in minor or moderate injuries.

Follow these guidelines to avoid personal injury, liquid leakage, burns or heat.

- When the P-touch labeler is not being used, store it out of the reach of children. In addition, do not allow children to put any P-touch labeler parts or labels in their mouths. If any object has been swallowed, seek medical attention.
- Do not touch metal parts around the print head immediately after printing.
- Do not touch the cutter blade. (See Unpacking the PT-P750W & Parts Description.)
- If leaked fluid from batteries gets on your skin or clothes, immediately rinse them with clean water.
- Remove the batteries and disconnect the AC adapter if you do not intend to use the P-touch labeler.
- Do not use any batteries other than those specified. Do not use combinations of old and new batteries or combinations of different types, different charging levels, different manufacturers or different models. Do not insert a battery with its plus and minus ends reversed.
- Do not drop or hit the P-touch labeler/AC adapter.
- Do not put your finger inside the P-touch labeler when you close the cassette cover.
- Before using Ni-MH rechargeable batteries, carefully read the instructions for the batteries and battery charger, and be sure to use them correctly.
- When using Ni-MH rechargeable batteries, charge the batteries with a specialized battery charger before using the batteries.
- Do not put your finger inside the tape exit slot. You could be injured by the cutter blade.

General Precautions

- Depending on the location, material, and environmental conditions, the label may unpeel or become irreparable, the color of the label may change or be transferred to other objects. Before applying the label, check the environmental conditions and the label material.
- Do not use the P-touch labeler in any way or for any purpose not described in this guide. Doing so may result in accidents or damage to the P-touch labeler.
- Unleash Brother TZe tapes with the P-touch labeler. Do not use tapes that do not have the TZe mark.
- Only use a soft, dry cloth to clean the P-touch labeler; never use alcohol or other organic solvents.
- Use a soft wipe to clean the print head; never touch the print head with your fingers.
- Do not place foreign objects into the tape exit slot, the AC adapter connector or battery compartment, etc.
- Do not place the P-touch labeler/batteries/AC adapter in direct sunlight or rain, near heaters or other hot appliances. In any location exposed to extremely high or low temperatures (e.g., on the dashboard or in the back of your car), high humidity, or in dusty locations.
- Do not try to print if the cassette is empty; it will damage the print head.
- Do not pull the tape while printing or feeding; it will damage the tape and the P-touch labeler.
- Any data stored in memory will be lost due to failure or repair of the P-touch labeler, or if the batteries expire.
- The P-touch labeler is not equipped with a charging feature for rechargeable batteries.
- The length of the printed label may differ from the displayed length on the computer.

 Federal Communications Commission (FCC) Declaration of Conformity (For USA Only)

Responsible Party: Brother International Corporation
200 Crossing Boulevard
P.O. Box 6911
Bridgewater, NJ 08807-0911 USA
TEL: (908) 704-1700

Product Name: Brother P-touch Electronic Labeling System
Model Number: PT-P750W

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This transmitter must not be co-located or operated in conjunction with any other antenna or transmitter.

Important

- The enclosed interface cable should be used in order to ensure compliance with the limits for a Class B digital device.
- Changes or modifications not expressly approved by Brother Industries, Ltd. could void the user's authority to operate the equipment.

* In case WLAN Interface is in use.

CAUTION: To maintain compliance with FCC’s RF exposure guidelines, use only the supplied antenna. Use of unauthorized antenna, modification, or attachments could damage the transmitter and may violate FCC regulations.

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices are absolutely safe. Low power Wireless devices emit low levels of radio frequency energy in the microwave range while being used. Whereas high levels of RF can produce energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to the reception of radio or television, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment must not be co-located or operated in conjunction with any other antenna or transmitter.

---

**Rechargeable Li-ion Battery (Li-ion battery optional with the PT-P750W)**

> **DANGER** Indicates an imminent hazardous situation which, if the product is handled without following the warnings and instructions, will result in death or serious injuries.

Carefully observe the following precautions for the rechargeable Li-ion battery (hereafter referred to as “rechargeable battery”). If these precautions are not followed, overheating, leaking, or cracks in the battery may result in an electrical short, explosion, smoke, fire, electric shock, injury to yourself or others, or damage to the product or other property.

- Use the rechargeable battery only for its intended purpose. The P-touch labeler and rechargeable battery are designed to function exclusively with each other. Do not insert a different rechargeable battery into the P-touch labeler or insert the rechargeable battery into a different P-touch labeler, otherwise fire or damage may result.
- To charge the rechargeable battery, insert the rechargeable battery into the P-touch labeler, and then use the AC adapter designed specifically for this P-touch labeler.
- DO NOT charge the rechargeable battery near a fire or in direct sunlight. This could activate the protection circuitry, which is designed to prevent danger from high heat. Activation of the protection circuitry could cause charging to stop, charging to occur with excessive current or voltage if the protection circuitry fails, or an abnormal chemical reaction within the battery.
- When charging the rechargeable battery, use only a battery charger designed specifically for the rechargeable battery.
- DO NOT allow wires or other metal objects to come into contact with the terminals of the rechargeable battery. Do not carry or store the rechargeable battery with metal objects such as necklaces or hairpins. This could cause an electrical short, and cause metal objects to overheat.
- DO NOT use or leave the rechargeable battery near fire, heaters, or other high temperature (above 176°F/80°C) locations.
- DO NOT allow the rechargeable battery to come into contact with or to be immersed in water.
- DO NOT use the rechargeable battery in corrosive environments, such as areas where salty air, salt water, acids, alkalis, corrosive gases, chemicals, or any corrosive liquid are present.
- DO NOT use the rechargeable battery if it is damaged or leaking.
- DO NOT directly solder any connections to the rechargeable battery. This could cause internal insulation to melt, gas to be emitted, or safety mechanisms to fail.
- DO NOT use the rechargeable battery with the polarity (+) (-) reversed. Check the orientation of the rechargeable battery before inserting it, and do not try to force the rechargeable battery into the P-touch labeler. Charging the rechargeable battery with the polarity reversed could cause an abnormal chemical reaction within the rechargeable battery or abnormal current flow during discharge.
- DO NOT directly connect the rechargeable battery to a household electrical supply.
- Liquid (electrolyte) leaking from the P-touch labeler or rechargeable battery may indicate that the rechargeable battery is damaged. If the rechargeable battery leaks, immediately stop using the P-touch labeler, unplug the AC adapter, and isolate the P-touch labeler by putting it in a bag.
- DO not touch the electrolyte. If electrolyte gets in the eyes, do not rub the eyes. Immediately rinse liberally with tap water or other clean water and seek the advice of a medical professional. If left alone, the electrolyte could cause eye damage. If electrolyte contacts your skin or clothing, immediately rinse them with water.
- DO NOT put the rechargeable battery, or a P-touch labeler with the rechargeable battery installed, into a microwave oven or a high pressure container.
- DO NOT leave the rechargeable battery without power in the main unit for a long period of time. This could shorten the life of the rechargeable battery or lead to an electrical short.
- If the P-touch labeler can only be used for a short period of time, even though the rechargeable battery is fully charged, the rechargeable battery may have reached the end of its service life. Replace the rechargeable battery with a new one. When replacing a P-touch labeler and replacing the rechargeable battery, cover the terminals of the old rechargeable battery with tape to avoid creating a short in the battery.
- DO NOT disassemble, modify, or attempt to repair the rechargeable battery.
- DO NOT dispose of the rechargeable battery in fire or cause it to overheat. This could cause the internal insulation to melt, gas to be emitted, or safety mechanisms to fail. Additionally, the electrolyte solution could catch fire.
- DO NOT puncture the rechargeable battery with any objects, subject it to severe shocks or throw it. Damage to the rechargeable battery’s protection circuit could cause the rechargeable battery to be recharged at an abnormal current/voltage or cause an abnormal chemical reaction within the rechargeable battery.
- DO NOT incinerate the rechargeable battery or dispose of it with household waste.

**Tips on Using the Rechargeable Li-ion Battery**

- Charge the rechargeable Li-ion battery before use. Do not use it before it is charged.
- The rechargeable Li-ion battery charging can take place in 41°F-95°F (5°C-35°C) environments. Charge the rechargeable Li-ion battery in an environment in this temperature range. If the surrounding temperature is out of this range, the rechargeable Li-ion battery will not be charged, and the battery indicator will remain lit.
- If the P-touch labeler is used when both the rechargeable Li-ion battery is installed and the AC adapter is connected, the battery indicator may turn off and charging may stop even if the rechargeable Li-ion battery has not been fully charged.

**Rechargeable Li-ion Battery Characteristics**

Understanding the properties of the rechargeable Li-ion battery will allow you to optimize its usage.

- Using or storing the rechargeable Li-ion battery in a location exposed to high or low temperatures may accelerate its deterioration. In particular, using a rechargeable Li-ion battery with a high charge (charged 90% or more) in a location exposed to high temperatures will considerably accelerate battery deterioration.
- Using the P-touch labeler while the rechargeable Li-ion battery is installed and charging may accelerate the battery’s deterioration. If using the P-touch labeler when the rechargeable Li-ion battery is installed, disconnect the AC adapter.
- If the P-touch labeler will not be used for longer than one month, remove the rechargeable Li-ion battery from the P-touch labeler, and then store the battery in a cool place away from direct sunlight.
- If the rechargeable Li-ion battery will not be used for a long period of time, we recommend charging it every 6 months.
- If you touch a part of the device while a Li-ion battery is charging, the device may feel warm. This is normal, and the device may be used safely. If the P-touch labeler becomes extremely hot, discontinue use.

**Rechargeable Li-ion Battery Specifications**

- Charging time: Approximately 6 hours when charged by a AC adapter (AD-E001).
- Nominal Voltage: DC 7.2 V
- Nominal Capacity: 1850 mAh

**Rechargeable Li-ion Battery**

**Charging Parameters**

- Maximum charging voltage: 8.2 Vdc
- Maximum charging current: 1330 mA

**Installing the Rechargeable Li-ion Battery**

To remove the rechargeable Li-ion battery, reverse the installation procedure.

**Charging the Rechargeable Li-ion Battery**

The rechargeable Li-ion battery can be charged while it is installed in the P-touch labeler. Perform the following procedure to charge the rechargeable Li-ion battery.

**Stopping the Rechargeable Li-ion Battery Charging**

To stop the rechargeable Li-ion battery from charging, disconnect the AC adapter cord.

---

**ATTENTION: (For USA and Canada)**

The Lithium Ion battery you have purchased is recyclable. At the end of its useful life, under various state and local laws, it is illegal to dispose of this battery into your municipal waste stream. Please call 1-888-8-BATTERY
1 Unpacking the PT-P750W and Parts Description

Check that the package contains the following before using the P-touch labeler. If any item is missing or damaged, contact your Brother reseller.

- PT-P750W
- AC adapter (AD-E001)
- Starter tape cassette
- USB cable

2 Setting the Tape Cassette

3 Connecting the Power Supply

Using the AC adapter

Using the batteries

To remove the batteries, reverse the installation procedure.

CAUTION
- Remove the batteries if you do not intend to use the P-touch labeling system for an extended period of time.
- Dispose of the battery at an appropriate collection point, not in the general waste stream. In addition, be sure to observe all applicable federal, state, and local regulations.
- When storing or discarding the battery, wrap it (for example with cellophane tape), to prevent it from short-circuiting.
  (Battery insulation example)
  1. Cellophane tape
  2. Alkaline or Ni-MH battery

4 Turning the P-touch labeler On or Off

On: Press the Power button.
Off: Press and hold the Power button until the Status lamp is lit in orange.

NOTE
- When turning the P-touch off, keep the AC adapter connected or the batteries installed until the Status lamp goes off.

5 Creating a Label using P-touch Editor Lite

1. Turn on the P-touch labeler (①), then press and hold down the Editor Lite button until the green Editor Lite lamp lights up (②). Connect the USB cable to the computer and PT-P750W.

NOTE
- Make sure that there is no slack in the tape.
- When setting or removing the tape cassette, make sure that the tape does not catch on the protrusion (1) or the print head.

CAUTION
If you cannot close the cassette cover, check to ensure the white lever is in the up position. If not, lift the lever, and then attach the cover.

NOTE
- Make sure that there is no slack in the tape.
How to Disconnect the P-touch Labeler

For Windows®
1. Exit P-touch Editor Lite by clicking on the in the top right corner of the window if using P-touch Editor Lite.
2. To disconnect the P-touch labeler, click the icon in the computer’s task bar ( , or ).
3. Click [ Safely remove USB Mass Storage Device].
4. When the message indicating that the device can be safely removed is displayed, turn off the P-touch labeler and disconnect the USB cable.

For Macintosh
1. Exit P-touch Editor Lite by clicking on the red button in the top left corner of the window, if using the P-touch Editor Lite.
2. Select [PT-P750W] on the desktop, and then perform one of the following:
   • Select [Eject] from the Context menu.
   • Drag and drop it in the Trash.
3. When a message indicating that the device can be safely removed is displayed, turn off the P-touch labeler and disconnect the USB cable.

Brother iPrint&Label
Brother iPrint&Label allows you to use features of your Brother machine directly from your mobile device, without using a computer. Simply search for "Brother iPrint&Label" in the App Store or Google Play.

How to Reset the P-touch Labeler

For Windows®
1. Turn off the P-touch labeler and disconnect the USB cable.
2. On the [Start] screen, click [ PT-P750W], [ Open folder to view files], and then double-click [ PTLITE10].
3. For Mac OS X v10.7.5/10.8.x./10.9.x
   - Double-click [PT-P750W] on the desktop and the [P-touch Editor Lite] application icon.

For Windows®
For Windows® 8/ Windows® 8.1
1. Exit P-touch Editor Lite by clicking on the in the top left corner of the window, if using P-touch Editor Lite.
2. To disconnect the P-touch labeler, click the icon in the computer’s task bar ( , , or )
3. Click [ Safely remove USB Mass Storage Device].
4. When the message indicating that the device can be safely removed is displayed, turn off the P-touch labeler and disconnect the USB cable.

For Macintosh
1. Exit P-touch Editor Lite by clicking on the red button in the top left corner of the window, if using the P-touch Editor Lite.
2. Select [PT-P750W] on the desktop, and then perform one of the following:
   • Select [Eject] from the Context menu.
   • Drag and drop it in the Trash.
3. When a message indicating that the device can be safely removed is displayed, turn off the P-touch labeler and disconnect the USB cable.
